

Horizontal Wire Management Tray

This 1RU high tray is designed to provide cable support and distribution for use with patch panels etc.

Finished in black powder coat.

1RU Cable Retaining Hoop Panel

Fitted with five hoops with open ends this panel fits across the racking to provide a sturdy support for patch cables etc. Finished in black powder coat.

Hinged Cable Carrier

Used to support cables entering the rear of equipment that is mounted on telescopic slides. It allows the equipment to be withdrawn without the need to disconnect cables.

Roof Cable Duct

Type	CODE
COMPLETE ASSEMBLY	03065-01
LOWER SECTION ONLY	03065-02

Cable Ducting

Cables are retained inside ducting by snap on cover and exit from ducting through the slots provided. Ducting size 75mm wide x 50mm deep. Made of PVC.

Earth Bars

The copper earth bar mounts vertically in the racks and comes with M6 tapped holes at 100mm pitch. Also available is an optional Insulation bush that provides protection from the frame if required.

Roof Cable Duct

This 2 stage fully adjustable cable duct extends from 450mm to 850mm. The addition of a third section extends it up to a further 400mm.

Mounts directly onto the roof gland plate opening. Both sections are in two parts allowing the duct to be assembled around existing cabling. Powder coat finish in customer choice of colour.

Suits all cabinets with top gland plate including wall mount cabinets.

Note: The third section is the first section mounted upside down. Flanges can be screwed to the ceiling.
