

PLINTH & BASE

Castor Rails

Castor Rails only add 30mm to the overall height of the rack. Suits all Type A & B and Series 2005 racks, however cannot be used in conjunction with Plinth Fan Unit. Levelling feet can be specified to use with these rails. Brakes can be supplied however they must be activated from within the rack. For 700 and 800mm wide Series 2005 racks that are reduced, the rails to mount the castors are already included, for non reduced cabinets the part number will include the rails. Features heavy duty castors. **Max Load 200kg**

BASE INFILL PANEL

To suit S2005 and Type A & B Cabinets. For use when access through the base of the cabinet must be prevented.

The panel comes with a 50 x 200mm gland plate.

RFI/Industrial Plinth

This plinth has levelling feet and adjustable holding down brackets accessible from the sides enabling adjustments to the mounting position without the need for cabinets access.

Additional features include gland plate covered cable entry at the front and back. Also available is a vented gland plate to permit air entry when vents are added to the cabinet base.

This heavy duty plinth comes in black powder coat finish. Increases overall height by 90mm.
